TRADITIONAL KNOWLEDGE · MODERN SCIENCE

1ST EURO-ASIAN CONGRESS OF INTEGRATIVE MEDICINE

THE FUTURE OF HEALTH

Traditional Knowledge · Modern Science · The Future of Health

Medicine is entering a new era. Advances in biomedical science, digital health, artificial intelligence, precision medicine and preventive healthcare are transforming how we understand health and disease — while established traditional medical systems remain an important part of healthcare knowledge and practice across much of the world.

The 1st Euro-Asian Congress of Integrative Medicine creates a common scientific platform for these fields to meet. For three days in Belgrade, clinicians, researchers, universities, healthcare institutions, innovators and international experts from Europe, Asia and beyond will explore how different medical traditions can contribute to a more scientific, preventive, personalised and human-centred future of health.

> *Traditional knowledge provides centuries of accumulated experience, while modern science provides the methods to investigate, validate and responsibly integrate relevant approaches into contemporary healthcare.*

The scientific independence of the Congress is a fundamental principle — scientific content, speaker selection and academic evaluation remain independent of any commercial partnership.

MEDICINE ACROSS CULTURES Exhibition · 15 June – 15 July 2027 · Belgrade EXPO 2027

An exhibition exploring medical knowledge across civilisations — and its future

From the medical traditions of China and India to the European and wider Eurasian heritage of medicine, the exhibition explores how different cultures have understood the human body, health, prevention, medicines and healing — with historical objects and reproductions, materia medica, manuscripts, multimedia interpretation and contemporary research. Traditional knowledge is presented in dialogue with science, revealing the exchange of knowledge across civilisations.

What can humanity's medical heritage teach us about the future of health?

BELGRADE 2027 · EUROPE MEETS ASIA

The Largest Event Ever Held in Serbia

World Expos have brought nations together around science, culture and progress since 1851. EXPO 2027 Belgrade continues that 175-year tradition on an unprecedented scale for Serbia — a 93-day world stage with 130+ participating countries and more than 4 million expected visits.

The Congress takes place inside this global moment, establishing Belgrade as a meeting point for dialogue between European and Asian medicine, science, universities, healthcare institutions and innovation.
